

Beginning July 1, 2015 the City of Radford recycling drop sites will go to single stream recycling, following the guidelines of the Montgomery Regional Solid Waste Authority. Single stream recycling means that residents will no longer have to separate their container and paper recycling at City recycling drop-off sites.

Please continue to separate corrugated (ridged or grooved) cardboard.

The city maintains two recycling drop-off sites:

- 200 George Street (Behind the Recreation Center)- 1 box-Single Stream, beginning July 1: Glass, Aluminum, Paper, Steel, and Plastics #1-7
- 17th Street- 2 boxes Single Stream, beginning July 1: Glass, Aluminum, Paper, Steel, and Plastics #1-7
 - Separate Box at this location for corrugated cardboard

Please note that plastic caps may be left on bottles and containers. The caps are recycled along with the rest of the container in the plastic pelletizing process.

Until July 1, 2015, please continue to separate your recyclables at both of these sites; which will continue to accept newspapers, commingled containers (plastics, glass, aluminum, etc.), and mixed paper. The 17th Street location accepts corrugated cardboard.
